

Evan Muise

PHD CANDIDATE

2424 Main Mall, Vancouver, British Columbia, Canada

✉ evanmuise@gmail.com 🏠 emuise.github.io 📞 0000-0003-3404-3220

Education

Ph.D. in Forestry

University of British Columbia

Vancouver, British
Columbia
2020-2025

B.Sc Environmental Science

Dalhousie University

Halifax, Nova Scotia
2020

GIS Certificate

Dalhousie University

Halifax, Nova Scotia
2020

Work Experience

Teaching Assistant

University of British Columbia

Vancouver, British
Columbia
2020-2025

- Head TA - Observing Earth from Space - 2022-2023
- TA - Observing Earth from Space - 2021, 2024
- TA - Introduction to GIS for Forestry and Conservation - 2021
- TA - Geospatial Data Analysis - 2020

Junior Program Officer (PM-01)

Natural Resources Canada

Vancouver, British
Columbia
2018-2019

Research Assistant (Urban Forestry)

Dalhousie University

Halifax, Nova Scotia
2018

Publications

Recreational boating diminishes eelgrass foundation species function and associated biodiversity.

Raymond, C.V., Slein, M.A., Muise, E.R., O'Connor, M.I.

Estuaries and Coasts
In Prep

Calculating forest ecological integrity from satellite-derived forest structure and functional attributes across a variety of ecosystems.

Muise, E.R., Coops, N.C., Hermosilla, T., Burton, A.C., Ban, S.S.

Remote Sensing in
Ecology and Conservation
In Prep

Characterizing Multidecadal Trends in Contemporary Small and Large Wildfires across British Columbia Using Annual Time Series Satellite Imagery

Qi, Y., Coops, N.C., Daniels, L.D., Hermosilla, T., Muise, E.R.

Int. J. Appl. Earth Obs.
Geoinf.
Submitted April 2025

Cumulative and component impacts of the human footprint on remotely sensed biodiversity indicators using dissimilarity to high integrity reference states.

Muise, E.R., Coops, N.C., Mulverhill, C., Hermosilla, T., Burton, A.C., Ban, S.S.

Int. J. Appl. Earth Obs.
Geoinf.
Submitted February 2025

Estimating structure of understory bamboo for giant panda habitat by developing an advanced vertical vegetation classification approach using UAS-LiDAR data.

Shen, X., Cao, L., Ma, Y., Coops, N.C., Muise, E.R., Wang, G., Cao, F.

Int. J. Appl. Earth Obs.
Geoinf.
2025

Disentangling linkages between satellite-derived indicators of forest structure and productivity for ecosystem monitoring.

Muise, E.R., Andrew, M.E., Coops, N.C., Hermosilla, T., Burton, A.C., Ban, S.S.

Scientific Reports

2024

Assessing representation of remote sensing derived forest structure and land cover across a network of protected areas.

Muise, E.R., Coops, N.C., Hermosilla, T., Ban, S.S.

Ecological Applications

2022

Presentations

Estimating the integrated and individual impacts of the human footprint on forest ecosystem structure and function.

Muise, E.R., Coops, N.C., Mulverhill, C., Hermosilla, T.

ForestSAT, Rotorua, NZ.

2024

Monitoring forest structural representation across a network of protected areas.

Muise, E.R., Coops, N.C., Hermosilla, T., Ban, S.S.

ForestSAT, Berlin, Germany.

2022

Documenting structural land cover change and disturbance across provincial BC parks for biodiversity assessment.

Muise, E.R., Coops, N.C.

BC Parks Living Lab Colloquium

2020

Awards

PhD Funding

Awards and Grants

Vancouver, British Columbia,

2020-2025

- President's Academic Excellence Initiative PhD Award (2022-2025)
- Oscar Soderman Memorial Bursary (2023)
- R.D. Winkler Bursary in Forestry (2023)

Undergraduate Research Funding

NSERC USRA

Halifax, Nova Scotia

2018

- Urban Forestry Summer Internship

Skills

Languages

English (native; fluent), French (Intermediate)

Programming Languages

R, Python

Science

Satellite image processing, spatial statistics, mapmaking, manuscript and report preparation
